

M56EXT-OCMT

External Serial v.92 Analogue Fax Modem

RS-232 v.92 + FAX

Make the right Connection.

Introducing the new high-speed Serial (RS232) v.92 Fax Modem for your Business and SoHo dialup connectivity applications.

The new Dynamode **M56EXT-OCMT** comes from a formidable heritage of Modems for which Dynamode has been developing over the last 15-years. Offering class-leading performance, robust analogue connectivity – even on poor quality dialup connections and a whole host of features to help you get the most out of your v.92 applications such as Internet, EPOS, Banking and Fax applications.

Using the proven Agere™ CSP1034S Chipset for assured analogue connection using industry standard ITU-T v.92/v.90 standards of up to 56,000Bps with full backward compliance with earlier ITU standards.

Integral Duplex speaker phone is included with Fax Class 1 and 3 support, as is Video Conferencing (H.324) with full compression and industrial Error Correction to v.42/MNP2-4 standards.

Enjoy legacy connection to your Systems, the **M56EXT-OCMT** comes with a built-in Serial (RS232) 9-way Female connector together with separate Phone and Line connection for your region.

Available now from your Authorized Dynamode Distributor.
